RESEARCH INTERESTS

I am passionate about studying the mechanisms driving species turnover across space and time, as well as exploring the factors that maintain biodiversity. I am particularly fascinated by the diverse outcome of resource consumption, species interactions, and species dispersal found in real ecological communities. I was trained as an ecologist in both observational and theoretical perspectives. I have joined multiple field surveys in subtropical montane forests in Taiwan, and have also studied theoretical frameworks in ecology. During PhD, I am excited to expand my skills in developing theoretical frameworks and designing experiments to test my hypotheses. Additionally, I am also keen to explore a variety of ecological systems in my research.

EDUCATION

M.S., Institute of Ecology and Evolutionary Biology, National Taiwan University 2020-2023

Thesis title: *"Disentangling ecological processes underlying the metacommunity by integrating several analytical methods"*

Advisors: David Zelený

B.S., Department of Mathematics, National Taiwan University 2016-2020

SKILLS

Programming: R, Julia, $\text{\LaTeX}$

Field work: forest overstory and understory census, functional trait collection and measurement

Numerical analysis: ordination, survival analysis

PUBLICATIONS AND CONFERENCES

In preparation

- **Huang, C.-L.**, Zelený, D., Chang-Yang, C.-H. Integrating several analytical methods to assess strength of ecological processes behind metacommunity assembly. (*in prep.*)

Conference

- **Huang, C.-L.**, Zelený, D. How well do available methods quantify the importance of assembly processes in ecological community data: a simulation approach. The 10th Biennial conference of the International Biogeography Society (June 2022, On-demand talk)

WORKING EXPERIENCE

Research assistant

National Taiwan University Advisor: Po-Ju Ke pending

Teaching assistant

Introduction to Theoretical Ecology Lecturer: Po-Ju Ke Fall 2022

Numerical Methods in Community Ecology Lecturer: David Zelený Spring 2022

General Botany Lab Lecturer: Fen-Ming Lee Fall 2021

Introduction to R for Ecologists Lecturer: David Zelený Fall 2020

Calculus Lecturer: Ya-Ju Tsai Fall 2019- Spring 2020

OTHER EXPERIENCE

Journal manuscript referee

Journal of Vegetation Science (1 reviewed)

Selected field survey experience

Overstory and understory composition survey and leaf traits collection in fog frequency gradient transect	2021-2022
Leaf trait collection, and seedling survey in Fushan Forest Dynamics Plot	2019-2020
Tree census in Lalashan Forest Dynamics Plot	2019-2020
Tree and seedling census in Kenting Forest Recreation Area	Summer 2019
Tree census in Fushan Forest Dynamics Plot	Winter 2019
